Scope of Practice

I conduct a full-time specialist vascular surgery practice covering most areas of vascular and endovascular surgery. The practice is based at Epworth Hospital, Richmond.

The practice emphasises minimally invasive endovascular and endovenous procedures.

Work involves elective and urgent work on several sites. There is a small allocation to other categories of work: medico-legal, WorkSafe, TAC.

Hospital assessment and governance matters are also handled.

Professional activities centre around the relevant professional associations: RACS and ANZ-SVS.
